

New Life Center Report

October 2018

Over the past five years, our organization has helped many children with serious disabilities to find a family. In late August we took Rustam into our family. Rustam is 13. He has strong mental retardation (consequences of cerebral palsy).

Now our family goes through a difficult period of adaptation and lapping. Rustam needs a special school, complex medical research, medical treatment and adaptation into a family life. We would appreciate your prayer support.

As you know, our ministry includes social rehabilitation of alcoholic and drug-addicted people. Vadim Savin completed a rehabilitation course, then stayed for two years to minister in a rehabilitation center. Later he met Oksana, who became his wife. Vadim and his wife adopted a little Vicka.

We are very happy that people who used to live in alcohol and drug addiction are now working, creating families. Moreover, some are examples of good works!
